BACHELOR OF BUSINESS ADMINISTRATION (MANAGEMENT INFORMATION SYSTEMS) (HONOURS)

KPT/JPS(N/345/6/0993)12/21

SCHOOL OF DIGITAL TECHNOLOGY

PROGRAMME OVERVIEW

The Bachelor of Business Administration (Management Information Systems) (Hons) is designed to equip students with specialised computing knowledge and skills in business administration. The management information systems major focuses on the concepts and tools necessary for planning, analysing, designing, developing, and maintaining organisational information resources. Graduates of the programme would be able to work effectively in multidisciplinary teams to formulate and provide creative, innovative, and effective digital solution on problems related to business information systems with relevant technology.

STUDY / CAREER PATHWAY

CAREER OPPORTUNITIES

- Information Systems Manager
- Information Security Manager
- Business Process Analyst
- Management Analyst
- System Analyst
- Software Systems Developer
- Database Developer
- Database Administrator
- Web Programmer
- Project Manager
- IT Consultant
- University Academician
- Corporate Trainer

COURSE OUTLINE

Year 1:

- Accounting
- Cognitive Process and Problem Solving
- Foundation of Information Systems
- Principles of Management
- Microeconomics
- Cyberpreneurship
- Problem Solving and Programming
- Macroeconomics
- Organizational Behaviour
- Data and Information Management
- Business Mathematics II
- Principles of Marketing
- Database Systems
- Hubungan Etnik
- Co-Curriculum

Year 2:

- Cost and Management Accounting
- Financial Management
- Business Information Systems Analysis and Design
- Business Statistics II
- Consumer Behaviour
- Computing and Society
- Internet Systems Development
- Enterprise Architecture
- Information Systems Project Management
- Human Resource Management
- Business Laws
- Labour and Industrial Relations
- Effective Communication - Workplace and Persuasive Presentation
- Tamadun Islam dan Tamadun Asia (TITAS)

Year 3:

- IS Strategy, Management, and Acquisition
- Database Modelling and Design
- Business Research Methods
- Production and Operation Management
- Information Technology Infrastructure
- Corporate Social Responsibility
- Strategic Management
- Final Year Project I
